SERVICES COMPANY

The key services that we provide in a utilities plant are inclusive of project management, maintenance and repairing of rotating equipment.

Our members have been in the engineering sector for over 15 years. Our company supports and complies with both Broad Based Black Economic Empowerment and Gender Empowerment principles. Our key services are:

- ☐ Servicing of Valves, Pumps; Shafts and Boosters;
- ☐ Re-engineering of Valves, Pumps, piping welding and
- ☐ Repair and maintenance of Valves, fire equipment in the plant and supply of related spare parts.
- ☐ Boilermaker services on site

PARTNERS

- ☐ Thunder Holdings – a site where refurbishment of rotating equipment: pumps and compressors

MARKETS

We value partnering with our clients, so we are prepared to offer the servicing of the equipment in the countries where the units are installed. We refurbish valves, pumps and shafts used in the mining, factories, utilities industries and municipalities.

Social Development and Localisation

We aim to be a leading services company in Mechanical Equipment Supply Chain to provide a broad based benefit and assist partnering companies with their CSI objectives, by training local labour, staff and people in the companies and communities where of the installation of the valves, welding, thus creating jobs and skills.

CORE VALUES

- ☐ Quality
- ☐ Reliability
- ☐ Localization
- ☐ Integrity
- ☐ Health & Safety
